

About energyRe

energyRe is an American-led energy company created to develop innovative infrastructure projects that meet rising electricity demand with affordable and reliable energy.

Our company portfolio combines generation, transmission and storage with a “community first” approach to project development, bringing together industry-leading expertise and local know-how.

With nearly 2GWs worth of projects, 600MWs in operation or active construction and 1.3 GWs in late-stage development, energyRe is a leader in utility-scale transmission, generation, storage and distributed generation solutions. We prioritize community engagement, public-private partnerships, and operational reliability in every project.

Barn Perch Solar

A Long-Term Commitment to Granville County

Investing in local priorities.
Producing reliable & affordable local energy. Preserving agricultural land for future generations.

Partnering with Granville County

energyRe is committing to a \$1.3 million community benefit agreement, plus \$2.7 million in local property tax revenue, for a total investment of

\$4 million in Granville County.

Without raising taxes or burdening local resources, this fund ensures long-term, flexible investment in Granville County's future while creating full financial assurance for local homeowners.

Investing in Granville County, Today and Tomorrow.

Barn Perch Solar will generate millions of dollars in tax revenue over the life of the project. energyRe is investing back into the community to support a host of critical services for the county, including:

- Granville Education Fund supporting students at Vance Granville Community College
- Granville Fire Fund for emergency responders' training and equipment
- The Granville Conservation Fund to preserve rural character
- Oak Hill Community Playground Fund for local playground improvements

A Good Neighbor

energyRe is committed to supporting community stakeholders through our Community Philanthropy Program, which makes grants to groups working to support veterans, emergency responders, education, food security, and the environment.

We don't just show up; we show up for the long term.

When the Project is complete, the panels are removed at no cost to the taxpayer or county government. The cost of removal is insured by the company, and the land is immediately suitable for farming.
